Unlock the Value of Your Office 365 Investments with BPA

The Newest Member of Your Development Team

Imagine moving away from paper-based, manual inefficiencies. What all could you accomplish if you stopped working with outdated technology? Think of the time and money you can save without costly in-house development efforts. Now, you can make this dream a reality with BPA's robust tools specifically engineered to tackle your most complicated and challenging projects so you don't have to.

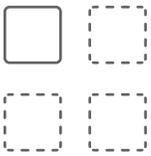

BPA No-Code Solution Builder: Rethink Application Development and Get Back to Work

BPA No-Code Solution Builder takes the complexity out of application building, enabling your teams to create cost effective, productivity enhancing solutions in a short timeframe. With over 30 different optional components, you can create a truly customized solution for your business needs.

“

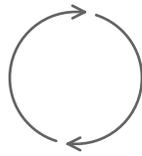

I swear only by [BPA's] components and SharePoint solutions. They enable us to extend Microsoft SharePoint and to, finally, use all of its power.

The Food and Environment Research Agency (FERA) – UK

BPA Point Solutions: Ready-to-use Quality and CRM

Simple, user-friendly, intuitive, and built on our No-Code platform, BPA's point solutions enable organizations to move away from antiquated, tedious paper-based processes and into a realm where effective, collaborative processes are a reality.

Quality & Risk Management

BPA Quality & Risk Management, a preconfigured, all-in-one quality and risk solution enables businesses to succeed with:

- Templates and prebuilt workflows that simplify common quality and risk management functions and internal controls
- Automation of quality and risk document management, approvals, workflows, publishing, and certificate renewals
- Organization-spanning collaboration and engagement tools
- A software-based approach that replaces manual processes and inefficient paper-based workflows
- Robust monitoring capabilities to quickly identify and control nonconformities

CRM & Project Management

One of the most common business challenges is gaining meaningful insight into what motivates your customers. BPA CRM & Project Management solves this problem with a centralized, easy-to-use, data entry-ready CRM and xRM platform that helps you promote company-wide alignment and gain a better understanding of customer needs.

CRM & Project Management also:

- Enables better understanding of customer needs
- Promotes organization-wide alignment and access to mission-critical customer data
- Simplifies data relation management with an intuitive GUI and easy-to-use controls
- Reduces the need for a dedicated CRM resource
- Comes preconfigured for instant insight, while remaining highly customizable and agile
